

SV-125

Pneumatic Spill Recovery Unit

As our responsibilities towards protecting the environment increase, industry has to consider the manner in which it handles liquid spills. The **SPILVAC SV-125** spill recovery unit provides an environmentally friendly solution.

Protect your plant with
SPILVAC SV-125

Applications:

- ✓ Oils & Lubricants
- ✓ Chemical Spills
- ✓ Agents & Solvents
- ✓ Other Liquid Spills

CAN YOU AFFORD INDUSTRIAL SPILLS?

SV-125 is a positive & cost effective solution to handling liquid spills

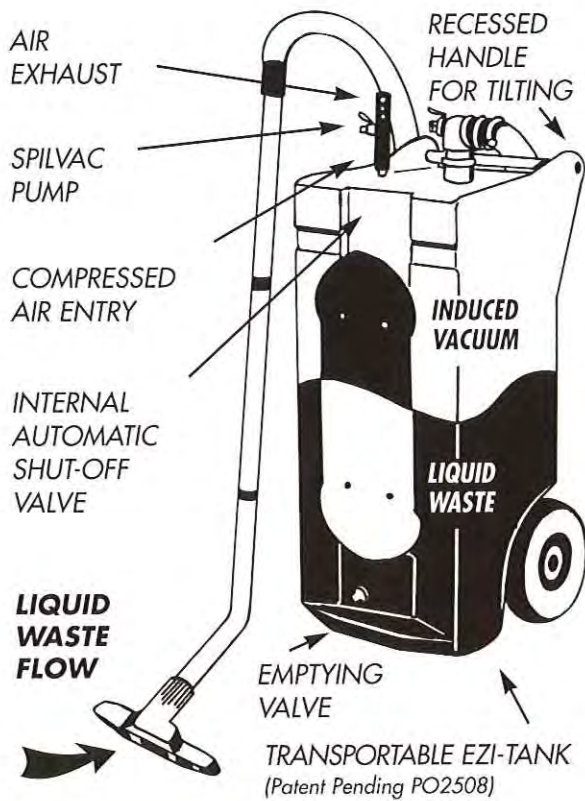

Introducing

SPILVAC SV-125 is a powerful pneumatic recovery unit that can clean up liquid spills & prevent pollution of the workplace & environment. **SPILVAC SV-125** is easily connected to an air line & is capable of recovering 125 Litres of water viscosity liquid in 75 seconds at 100 psi line pressure.

Unlike absorbent materials **SPILVAC SV-125** can be used over & over again. Recovered liquid can be poured out of the 125 litre tank for reuse or recycling.

SPILVAC SV-125 is a positive & cost effective solution to handling liquid spills.

SV-125

FEATURES

- ✓ Environmentally Friendly & Reusable
- ✓ Maintenance Free
- ✓ Cost Effective
- ✓ Easy To Use & Operate

A quality manufactured product with no electrical or mechanical components ensures **HEAVY DUTY DURABILITY.**

A safety float valve prevents over-filling

Operating Instructions:-

1. Connect to air supply (Max air pressure 100 psi)
2. Slowly open lever valve.
3. Vacuum up spill.
4. Empty tank by opening valve at the base of the tank.

KIT CONTENTS

- 125 litre rotary moulded EZI-Tank
- Spilvac pump with shut-off valve
- Air control valve
- 40 mm camlock set
- 3 metres x 40 mm suction hose
- 3 piece stainless steel wand set
- 420 mm squeegee head

PERFORMANCE

Pressure	Kg/cm ²	4	5	6	7
	psi	56.89	71.11	85.33	99.56
Air Consumption	M ³ /min	0.71	0.85	1.05	1.13
	cfm	25	30	37	40
Vacuum	mmHg	177.8	200	214.3	228.6
	inHg	6	7	7.5	8
Water	Ltrs/sec	1	1.18	1.33	1.67
Oil SAE30	Ltrs/sec	0.55	0.58	0.68	0.73
