
CESCO Australia setting a solid foundation ...

CESCO Australia Limited (CAL) is more than just Agis. It's been a real privilege working at the forefront of the Concrete Agitator business in equipment design, manufacture and supply for over half a century.

You may also know that CAL is the leading supplier of concrete mixers and servicing in Australia; producing, servicing and supporting our mixer fleet for the most recognizable names in the Australian and New Zealand markets. The Cesco Engineering and manufacturing team have been one of the industry standard bearers for more than 50 years, leading the way in the design and manufacture of all types of concrete agitators.

BUT DID YOU KNOW that CAL is also heavily involved in the civil works segment of the industry. Our company's specialization extends heavily into civil engineering, foundation drilling and projects works. **Cesco Deep Foundation Equipment (CDFE)** has been an integral part of CAL – approaching 10 years young.

Cesco Deep Foundation Equipment has a proven track record in the foundation industry and concentrates in the sale and rental of Continuous Flight Augers, Hydraulic Crawler & Micro Piling Rigs, Hydraulic Bore Pile Rigs, Impact and Vibratory Hammers, Drill Rigs, Jet Grouting Equipment etc.

CDFE has achieved a growing market share amongst the Piling and Foundation industry for the supply of foundation equipment around Australia and internationally. **CDFE** has gained great acceptance by clients with their ability to coordinate and support project demands for all Piling and Foundation needs and requirements.

CDFE has a hire fleet of Vibratory and Impact Hammers in varying sizes that will cater for the majority of clients' foundation needs. We have listened to our clients' needs - offering both long and short-term hire plans available to cater for any project needs, backup and support.

Importantly for any Project Manager – we are on call 24/7. We have experience, proficiency and back up in onshore, off-shore and international project requirements. Really for any piling or foundation project you may be working on or in the forward stages of tendering or planning - there is no need to go anywhere else!

Our products are designed to meet the demanding work conditions and performance requirements of any job. We can provide customization of power packs - such as fitting the with new John Deere electronic diesel engines or upon request reconditioned diesel engines.

CDFE utilize state-of-the-art designed Hydraulic Vibratory Hammers, which are built with a gun-driller suppressor base plate that eliminates the hydraulic hose connections to the hydraulic motors on the gear case. Our Hydraulic Vibratory Hammers are coupled with Hydraulic Power packs.

Features of the Power packs include noise reduced structure frame, reconditioned mechanical engines (based on customer requirements), concealed exhaust silencer, user friendly control panel, remote control pendant, easy maintenance and service access into power packs. The power pack canopy is fitted with container locking blocks, stainless steel latches and hinges and a built in step ladder on the power pack body for easy roof access.

Cesco Australia and **CDFE** would appreciate the opportunity to tender on any opportunities that are available, contact our friendly team today on (07) 3908 6088 or email kennyteh@cescoaustralia.com
